What this standard covers

This standard specifies the test method for the moisture content of oil-immersed fibrous insulating material. This standard applies to the determination of moisture content in new and aged dry and oil-impregnated paper, oil-impregnated paperboard and white cloth tapes. This standard is applicable to the determination of water content of 0.1% to 20% of the sample.

Document data

International classification (ICS): 75.080.

Chinese classification (CCS): E60.

Estimated length of the Chinese original: 6,614 words.

Adopted international standard: IEC 60814-1997, NEQ.

Supersedes the earlier edition DL/T 449-1991.
