### What this standard covers

This standard specifies the principles for the selection and parameter selection of power plant coal mills and milling systems. This standard is applicable to the selection and design of various high, medium and low speed coal mills and their corresponding milling systems for 65t/h~3200t/h power plant pulverized coal boilers.

### Document data

International classification (ICS): 27.010.

Chinese classification (CCS): F23.

Estimated length of the Chinese original: 65,680 words.

Supersedes the earlier edition DL/T 466-2004.
