### What this standard covers

This standard specifies the thermal power plant selective catalytic reduction (SCR) flue gas denitrification engineering and construction and installation of construction inspection requirements. This standard applies to new construction, expansion and renovation of thermal power plants Selective Catalytic Reduction (SCR ammonia method) flue gas denitrification engineering and construction and installation of construction quality acceptance evaluation work.

### Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F23.

Estimated length of the Chinese original: 68,692 words.
