What this standard covers

This standard is applicable to the construction drawing design of power distribution network projects of 10(20)kV and below. This standard only sets requirements for the content and depth of design documents, and does not serve as the internal professional division of labor and volume division standards of each design unit. In addition to implementing the provisions of this standard, the construction drawing design documents of the distribution network shall also comply with the provisions of the current relevant national standards.
