What this standard covers

This standard is applicable to the preparation of pre-feasibility study reports for newly built solar thermal power plants. When the solar thermal power generation project has multiple schemes for concentrating heat collection methods and single unit capacity, and multiple proposed sites are located in different areas, it is advisable to prepare a pre-feasibility study report. The preparation unit of the pre-feasibility study report of the solar thermal power plant shall have the consulting qualification that meets the national requirements. The preparation of the pre-feasibility study report of the solar thermal power plant shall not only comply with the provisions of this standard, but also comply with the provisions of the current relevant national standards.
