What this standard covers

This standard specifies the basic technical requirements, operating environment, power supply requirements, system performance requirements, technical documents, etc. of the static rectification excitation system for large and medium-sized hydro-generators. This standard is applicable to the self-excited static rectification excitation system of hydro-generators with a single unit capacity of 10MW and above. Other excitation methods can be referred to for execution.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): K51.

Estimated length of the Chinese original: 19,157 words.

Supersedes the earlier edition DL/T 583-2006.
