What this standard covers

This standard specifies the safety supervision requirements for boiler pressure vessels in the power industry. This standard applies to steam generators with rated pressure greater than or equal to 9.8 MPa for power generation, main soda water pipes for power plant thermal systems, and pressure vessels for power generation. The power boiler with a rated pressure less than 9.8 MPa can be referred to for implementation.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F25.

Estimated length of the Chinese original: 34,323 words.

Supersedes the earlier edition DL/T 612-1996.
