What this standard covers

This standard specifies the multifunction energy meter with handheld unit (HHU) data terminal equipment or other physical connection between the communication link and application of technical specifications. This standard applies to the local system and handheld multi-function meter unit (HHU), or other data terminal equipment for point to point or more from a major means of exchanging data. Other energy meter with a communication function, such as single- phase energy meter and multi-rate watt-hour meter, reference may be used.
