What this standard covers

This standard specifies the contents and methods of the acceptance test of the analog control system of the thermal power plant, and the quality indexes that should be achieved. This standard applies to stand-alone capacity of 125MW and above units of the thermal power plant new construction and technological transformation project of the analog control system acceptance test. Acceptance tests of other types of units and acceptance tests after maintenance of the unit can also be carried out with reference to this standard.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F24.

Estimated length of the Chinese original: 21,217 words.

Supersedes the earlier edition DL/T 657-2006.
