What this standard covers

This standard specifies the principle of selection of metal materials for thermal power generation equipment, the main acceptance criteria and quality requirements of important components of metal materials. This standard is applicable to the selection and replacement of metallic materials in the new units of thermal power plants, and the selection and replacement of metal materials in replacement parts of in-service units.

Document data

International classification (ICS): 23.040.01.

Chinese classification (CCS): P61.

Estimated length of the Chinese original: 36,319 words.

Supersedes the earlier edition DL/T 715-2000.
