What this standard covers

This standard specifies the technical conditions for the welding of steam turbine steels in thermal power plants. This standard applies to the steam turbine cylinder, the main steam valve, regulating valves, tee and partitions and other steel and forgings repair welding, but also for other power plant steel welding.

Document data

Chinese classification (CCS): F23.

Estimated length of the Chinese original: 14,154 words.

Supersedes the earlier edition DL/T 753-2001.
