What this standard covers

This standard specifies the classification, marking and specifications, technical requirements, test methods, inspection rules, sampling and determination rules, as well as identification, transportation, stacking, and factory certification of glass fiber reinforced plastic cable ducts. This standard applies to glass fiber reinforced plastic cable duct made of thermosetting resin as matrix, glass fiber roving and its products as reinforcing materials, using fixed-length mechanical winding, braided winding and pultruding processes.

Document data

International classification (ICS): 29.240.01.

Chinese classification (CCS): F20.

Estimated length of the Chinese original: 12,148 words.

Supersedes the earlier edition DL/T 802.2-2007.
