What this standard covers

This standard specifies the main criteria and relevant limits for selecting the combustion mode and selecting the characteristic parameters of the furnace according to the designed coal quality for the large-capacity solid-state slag pulverized coal boilers, and also stipulates the requirements for the design of the furnace and the burner. This standard applies to the maximum continuous evaporation capacity of 1000t/h ~ 3000t/h level of large-capacity boilers.

Document data

International classification (ICS): 27.060.

Chinese classification (CCS): J98.

Estimated length of the Chinese original: 29,259 words.

Supersedes the earlier edition DL/T 831-2002.
