What this standard covers

This standard specifies the contents and technical requirements for chemical supervision in the basic construction stage of power generation thermal equipment. This standard applies to the thermal power plant thermal power plant rated pressure of 12.7MPa and above units. Rated pressure less than 12.7MPa of the unit, can refer to the implementation.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F23.

Estimated length of the Chinese original: 11,171 words.

Supersedes the earlier edition DL/T 889-2004.
