What this standard covers

This standard specifies the product classification and use, technical conditions, test methods, inspection rules, packaging, marking, transportation and storage of anti-corrosion materials used in the chimney (flue) lining and exhaust pipe of thermal power plants. This standard applies to all kinds of anti-corrosion materials used in reinforced concrete chimneys, steel chimneys, brick chimneys and their flue linings and exhaust pipes.

Document data

International classification (ICS): 81.080.

Chinese classification (CCS): F23.

Estimated length of the Chinese original: 21,258 words.

Supersedes the earlier edition DL/T 901-2004.
