What this standard covers

This standard specifies the requirements for the ordering and acceptance of general-purpose valves made of steel for thermal power generation. This standard applies to the maximum working temperature is not greater than 630°C, the maximum working pressure is not greater than 45MPa, the pressure class Class is not greater than 4500, the nominal size DN10 ~ DN800, NPS3/8 ~ NPS28 for thermal power generation casting, forging, flange, welding, Pairs of clamps and thread-connected steel gate valves, globe valves, throttle valves, check valves, butterfly valves, ball valves, plug valves, and other general-purpose valves.

Document data

International classification (ICS): 27.040.

Chinese classification (CCS): K54.

Estimated length of the Chinese original: 13,120 words.

Supersedes the earlier edition DL/T 922-2005.
