What this standard covers

This standard specifies the classification, design, materials, manufacture, testing, inspection and acceptance, installation and commissioning, use, maintenance and inspection, ordering and supply of check valves for thermal power generation. This standard is applicable to check valves used in thermal power steam and water systems where the working pressure is not more than 45MPa and the operating temperature is not more than 630°C. The check valves of other systems of thermal power generation may refer to the use.

Document data

International classification (ICS): 27.040.

Chinese classification (CCS): K54.

Estimated length of the Chinese original: 18,112 words.

Supersedes the earlier edition DL/T 923-2005.
