What this standard covers

This standard specifies technical requirements for the production environment, reference LED projection system, image characteristics, audio characteristics, and subtitles for digital cinema LED projection distribution masters, as well as requirements for the peak bit rate, components, and title naming conventions of digital cinema LED projection packages. It applies to the production and quality control of digital cinema LED projection distribution masters, and the generation, verification, and management of digital cinema LED projection packages. Operations, maintenance, technical management, and equipment installation at relevant production facilities may also refer to this standard.

Document data

International classification (ICS): 37.060.99.
