### What this standard covers

This standard specifies the Geological Laboratory of rock and mineral identification, heavy sand identification, coal and rock identification and X-ray analysis of geological samples, differential thermal analysis, infrared spectroscopy, pollen analysis, electron microprobe analysis, test quality analysis, electron microscopy the basic requirements. This section applies to the identification of rocks and minerals geology and mineral laboratory quality management.

### Document data

International classification (ICS): 19.020.

Chinese classification (CCS): D00.

Estimated length of the Chinese original: 14,164 words.

Supersedes the earlier edition DZ 0130.2-1994.
