What this standard covers

This standard specifies the atomic fluorescence spectrometer classification, technical requirements, test methods, inspection rules and signs, packaging, transportation, storage and other requirements. This standard applies to non-dispersive X-hydride generation atomic fluorescence spectrometer, the instrument used to measure such easy hydride-forming elements and easily reduced to atomic mercury vapor state. This standard is the class instrument design, manufacture, testing, use and develop appropriate product standards common technical basis.

Document data

International classification (ICS): 17.06.

Chinese classification (CCS): D82.

Estimated length of the Chinese original: 13,117 words.
