What this standard covers

This standard specifies the type, model and basic parameters of polyurethane hydrocyclone, requirements, sampling, test methods, inspection rules, signs and packaging. This standard applies to PU (polyurethane urethane polyurethane, abbreviated PU) elastomers made from the main material of hydrocyclones, which are widely used in the mud (mine) pulp grade, off mud and concentration.

Document data

International classification (ICS): 17.1.

Chinese classification (CCS): D96.

Estimated length of the Chinese original: 9,936 words.
