What this standard covers

This standard specifies the exploration purpose of rare metal minerals such as lithium (Li), rubidium (Rb), cesium (Cs), beryllium (Be), niobium (Nb), tantalum (Ta), zirconium (Zr), hafnium (Hf), etc. And the requirements of the exploration stage, the extent of the exploration work, the green exploration requirements, the exploration work and quality, feasibility evaluation, and resource reserve estimation. This standard is applicable to the geological exploration of rare metal minerals, the estimation of resource reserves and the evaluation of their results.

Document data

International classification (ICS): 73.020; 73.060.99.

Chinese classification (CCS): D12.

Estimated length of the Chinese original: 49,432 words.

Supersedes the earlier edition DZ/T 0203-2002.
