What this standard covers

This standard specifies the drilling engineering design, drilling preparation and acceptance, drilling engineering quality requirements, drilling operations, coalbed methane wells control requirements, coring construction operations, cementing job requirements, health, safety and environmental management (HSE) requirements, drilling Concurrent engineering data transfer requirements and the drilling and completion and acceptance ten content. This standard specification of the whole process of coal-bed methane drilling operations procedures and requirements. This standard applies to 1500m depth within the parameters of coalbed methane wells, design and production wells drilling vertical wells, , test well construction operations, project quality requirements, Information Concurrent and acceptance, etc., for the coal into gas, shallow wells, water Hirai drilling operations may refer to the standard content may refer to other executive deficiencies related to oil and gas industry standards.

Document data

International classification (ICS): 73.020.

Chinese classification (CCS): D15.

Estimated length of the Chinese original: 25,239 words.
