What this standard covers

This standard specifies the identification content, steps, rock characterization and naming requirements of rock specimens and sheets under polarized light microscopy. This standard is applicable to the identification of rock specimens and flakes in the geological survey, mineral exploration, engineering survey and mineral utilization of the district. This standard does not apply to coal, salt rock and oil rock specimen identification.

Document data

International classification (ICS): 73.020.

Chinese classification (CCS): D04.

Estimated length of the Chinese original: 13,134 words.
