What this standard covers

This standard specifies the objectives, tasks, basic principles and basic content, classification of experimental research levels, requirements for experimental research levels, and related matters related to experimental research in solid mineral exploration work. This standard is applicable to the technical performance test research of ore processing and smelting at each stage of solid mineral exploration, and can be used as the basis for solid mineral exploration design, achievement acceptance and mineral resource evaluation.

Document data

International classification (ICS): 73.020.

Chinese classification (CCS): D10/19.

Estimated length of the Chinese original: 12,146 words.
