## 1 Foreword

EJ/T 20138.3-2016 was issued by State Administration of Science, Technology and Industry for National Defense on 14 December 2016.

It is one of 6 parts of the EJ/T 20138 series.

The EJ/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a

producer declares conformity with it.

## 2 Scope Preview

EJ/T 20138.3-2016 is filed under Chinese Standard Classification F40, in the field of energy and nuclear technology.

This catalogue holds 312 other EJ/T standards without an ICS number.

In this catalogue, EJ/T standards carry edition years from 1992 to 2018.

## 3 About this standard

Sector: Nuclear Industry Standard (Recommended)

Issued by: State Administration of Science, Technology and Industry for National Defense

English translation: about 8 pages (approximate)

Chinese original: about 8,892 characters

## 4 Related standards

Other parts of this standard:

EJ/T 20138.1-2016 - Rules for the preparation of geological records for hard rock type uranium deposits - Part 1: Drilling integrated histogram, exploration line profile, ore body longitudinal (horizontal) projection

EJ/T 20138.2-2016 - Specification for series of geological maps on hard rock-type uranium deposits -- Part 2: the Structure Outline Map

EJ/T 20138.4-2018 - Specification for the preparation of geological maps of hard rock type uranium mines Part 4: Survey degree map, actual material map

EJ/T 20138.5-2018 - Specification for the preparation of geological maps of hard rock type uranium mines Part 5: Comprehensive results of hydrogeological maps and bored pumping tests

EJ/T 20138.6-2018 - Specification for the preparation of geological maps of hard rock type uranium deposits Part 6: Sampling distribution map of geophysical parameters, comprehensive results of geophysical survey

Standards on related subjects:

GB/T 10266-2008 - Specification for sintered uranium dioxide pellets
