Table of Contents

1 Scope
2 Normative References
3 Sampling for Rock/Mineral Specimens and Identification
3.1 Sampling Objectives
3.1.1 Rock and Mineral Specimens
3.1.2 Samples for Rock and Mineral Identification
3.1.3 Single Mineral Samples
3.1.4 Paleontological Fossil Samples
3.1.5 Artificial Heavy Mineral Concentrate Samples
3.2 Sampling Principles
3.3 Sampling Classification
3.4 Sampling Methods and Requirements
3.4.1 Sampling for Rock/Mineral Specimens and Identification
4 Analytical Sampling
5 Isotope Geological Sampling
6 Sampling for Uranium Ore Processing Technology Tests
7 Sampling for Mining Technical Conditions

1 Foreword

EJ/T 983-2018 was issued by State Administration of Science, Technology and Industry for National Defense on 28 December 2018 and has been in force since 1 March 2019.

This is a draft translation for reference among interesting stakeholders. The finalized translation (passing through draft translation, self-check, revision and verification) will be delivered upon being ordered.

2 Scope

This standard specifies the objectives, principles, methods, and requirements for sample preparation and transportation for non-in-situ leaching uranium ore geological sampling, including rock and mineral specimen collection, rock and mineral identification sampling, analytical sampling, isotope geological sampling, ore processing technology test sampling, and mining technology sampling. This standard applies to geological sampling work for non-in-situ leaching uranium deposits.

3 About this standard

Sector: Nuclear Industry Standard (Recommended)

Issued by: State Administration of Science, Technology and Industry for National Defense

English translation: about 15 pages (approximate)

4 Classification and status

Chinese Standard Classification (CCS): F 40

Prefix EJ/T: recommended standard.
