What this standard covers

This standard specifies the method for identifying textile fibers using near-infrared spectroscopy. This standard is applicable to all types of single-component textile fibers with characteristic peaks in the near-infrared spectrum. It is not applicable to fibers without characteristic peaks in the near-infrared spectrum (such as inorganic fibers) and fibers with abnormal characteristic peaks in the near-infrared spectrum (such as some dark-colored fibers). sample).

Document data

International classification (ICS): 59.080.01.

Chinese classification (CCS): W04.

Estimated length of the Chinese original: 33,399 words.
