What this standard covers

This standard specifies the method for determining the loop length and yarn linear density of weft-knitted fabrics. This standard is applicable to all kinds of weft knitted fabrics, and the detachable warp knitted fabrics can be used for reference. This standard does not apply to fabrics that cannot completely eliminate the curl on the yarn under a certain straightening tension, or cannot be split and the yarn is damaged.

Document data

International classification (ICS): 59.080.30.

Chinese classification (CCS): W04.

Estimated length of the Chinese original: 7,798 words.
