### What this standard covers

This standard specifies the method for determining the fiber content of a two-component mixture of copper-modified polyacrylonitrile fiber and certain other fibers by chemical analysis after removal of non-fibrous matter. This standard applies to copper-modified polyacrylonitrile fiber and polyamide fiber, polyacrylonitrile fiber, cellulose fiber (cotton, hemp, viscose fiber, lyocell fiber, modal fiber, copper ammonia fiber), polyester fiber, Two-component blend of polyurethane elastane, acetate, triacetate.

### Document data

International classification (ICS): 59.080.01.

Estimated length of the Chinese original: 11,159 words.
