What this standard covers

This standard specifies the method for the determination of polyethylene fiber content in two-component mixtures after removal of non-fibrous matter by the paraffin oil method. This standard applies to polyethylene fibers and animal hair fibers (sheep wool, cashmere, alpaca and mohair), cellulose fibers (cotton, flax, ramie, viscose fiber, modal fiber, lyocell fiber and cupro ammonia fiber)), silk (mulberry silk, tussah silk) and synthetic fibers (polyester, polyamide, polyacrylonitrile, aramid and polypropylene).
