What this standard covers

This standard specifies a rapid screening method for the determination of nickel release from accessories in textile products using scanning electron microscopy/X-ray energy spectroscopy and energy-dispersive X-ray fluorescence. This standard applies to metal-coated accessories and metal accessories without metal coating on textile products.

Document data

International classification (ICS): 59.080.01.

Chinese classification (CCS): W04.

Estimated length of the Chinese original: 6,659 words.
