What this standard covers

This standard specifies the method for testing and calculating the heat balance of setting machines for heat setting textiles. This standard is applicable to the test and calculation of the heat balance of the setting machine heated by steam, heat transfer oil, natural gas and liquefied petroleum gas. This standard can also be referred to for the test and calculation of the heat balance of other types of shaping machines.

Document data

International classification (ICS): 13.020.10.

Chinese classification (CCS): W04.

Estimated length of the Chinese original: 26,264 words.
