What this standard covers

This standard specifies the temperature and moisture regain of cotton and chemical fiber spinning, blended yarn breaking strength of the correction method, and gives the different conditions of temperature and moisture regain breaking strength correction factor. This section applies to gray cotton yarn, blended yarn, spinning and dyeing processing line or in a non-standard atmospheric conditions do not meet the criteria in the equilibration time under the conditions of the measured breaking strength of the amendment. This section does not apply to other materials are spun yarns.

Document data

International classification (ICS): 59.080.01.

Chinese classification (CCS): W10.

Estimated length of the Chinese original: 120,148 words.

Supersedes the earlier edition FZ/T 10013.1-1999.
