What this standard covers

This Standard specifies the flame retardant synthetic fiber raw slice Test methods - oxygen index. This Standard applies to polyester (PET) chips, slices and poly caprolactam polyhexamethylene adipamide slices. Other sections may refer to the use of synthetic materials. This Standard is only used to determine the combustion performance of materials under laboratory conditions, product quality control, and not as assessed under actual conditions of use fire risk basis, one or all of the material factors of a special-purpose fire can only be analyzed. This Standard does not apply to the Assessment of the heat was high shrinkage material.

Document data

International classification (ICS): 59.060.20.

Chinese classification (CCS): W50.

Estimated length of the Chinese original: 12,174 words.
