What this standard covers

This standard specifies the technical requirements for fiber-grade antimony-free recycled polyethylene terephthalate (PET) chips, describes the corresponding test methods, and specifies the inspection rules, marking, packaging, transportation and storage. This standard applies to semi-dull fiber-grade slices made of recycled polyethylene terephthalate (PET) using non-antimony catalyst polymerization. Other similar products can be used as a reference.

Document data

International classification (ICS): 59.060.20.

Chinese classification (CCS): W51.
