What this standard covers

This standard specifies the product identification, technical requirements, inspection rules, marking, packaging, transportation, and storage of sea-island polyester staple fibers, and describes the corresponding test methods. It applies to undyed sea-island polyester staple fibers (bright or dull/delustered) with a nominal linear density of 2.0°C5.0 dtex, an island count of 8°C64, and a sea-island ratio ranging from 20/80 to 35/65; other types of sea-island polyester staple fibers may refer to this standard.

Document data

International classification (ICS): 59.060.20.

Chinese classification (CCS): W52.
