What this standard covers

This standard provides high elongation resistant nylon/cotton yarn of terms and definitions, classification and identification, technical requirements, test methods, inspection rules and signs, packaging, transportation and storage requirements. This standard applies to nylon 66 filament yarn and sliver as raw materials for the extension cord weft with a high heat-resistant nylon/cotton yarn quality inspection, and its core nylon 66 filament yarn containing 50 % to 65%, specifications for 22tex ~ 32tex of yarn rolls. Others can refer to the same type of product to use.

Document data

International classification (ICS): 59.060.20.

Chinese classification (CCS): W52.

Estimated length of the Chinese original: 13,122 words.
