What this standard covers

This standard specifies the technical requirements for creep-resistant ultra-high molecular weight polyethylene filaments, describes the corresponding test methods, specifies the requirements for inspection rules, marking, packaging, transportation, storage, etc., and gives the classification and identification of products. This standard applies to creep-resistant ultra-high molecular weight polyethylene filaments with a nominal linear density of 220.0 dtex to 2640.0 dtex. Other specifications of creep-resistant ultra-high molecular weight polyethylene filaments can be used for reference.

Document data

International classification (ICS): 59.060.20.

Chinese classification (CCS): W52.

Estimated length of the Chinese original: 10,158 words.
