What this standard covers

This standard specifies the terms and definitions, product classification and identification, technical requirements, test methods, inspection rules, signs, packaging, transportation and storage of substrate-coated hot-melt film adhesive interlinings. This standard applies to substrate-coated hot-melt adhesive interlinings (thickness of the film is 0.03 mm to 0.15 mm) obtained by scraping the hot-melt adhesive onto the substrate using hot-melt adhesive as the raw material and applying the heating and scraping process.

Document data

International classification (ICS): 59.080.99.

Chinese classification (CCS): W13.
