What this standard covers

This standard specifies the terms and definitions, requirements, test methods, inspection rules, signs, packaging, transportation and storage of waste textile reprocessing fiber gold pan felt. This standard is applicable to the gold rush felt made by needle-punching process, which uses waste textile reprocessed short fibers as the main raw material, mixed with other chemical short fibers. Gold panning felt made from other waste textile raw materials through needle punching or other processes can be implemented as a reference.

Document data

International classification (ICS): 59.080.30.

Chinese classification (CCS): W59.

Estimated length of the Chinese original: 9,953 words.
