What this standard covers

This standard specifies the terms and definitions, classification, filter material codes and nomenclature, requirements, test methods, inspection rules, packaging, storage, transportation and marking of stiff filter materials for high-temperature resistant filter cartridges. This standard is applicable to stiff filter media for filter cartridges with long-term use temperatures in the range of 130°C to 260°C. For stiff filter materials for high-temperature filter cartridges whose fiber materials and molding processes are not mentioned in this standard, please refer to the requirements of this standard.

Document data

International classification (ICS): 59.080.30.

Chinese classification (CCS): W59.
