What this standard covers

This standard specifies the terms and definitions, requirements, test methods, inspection rules, packaging, storage, transportation and labeling of lanyards. This standard applies to polyester, nylon, para-aramid and other synthetic fiber filaments as raw materials, used for connecting fall protection systems or hanging points in high-altitude operations, outdoor sports and other activities. The diameter of the rope is 9.0mm ~ 12.0 mm, with a load-bearing capacity not exceeding 100kg.

Document data

International classification (ICS): 59.080.50.
