### What this standard covers

This standard specifies the terms and definitions, product classification, technical requirements, test methods, inspection rules, marking, packaging, transportation and storage of two-component spunbond nonwoven fabrics. This standard applies to two-component spunbond nonwoven fabrics made from two polymers as raw materials, using a parallel or core-sheath composite spinning process, through filament separation, web laying and thermal bonding.

### Document data

International classification (ICS): 59.080.30.

Chinese classification (CCS): W59.

Estimated length of the Chinese original: 9,963 words.
