What this standard covers

This standard specifies the determination of wool textile fabrics under a certain load at specified elongation and stretch to a certain length of time after removal of the load caused by the residual strain (non-return of elongation) of the test method. This standard applies to a certain flexibility of wool woven and knitted wool.

Document data

International classification (ICS): 59.080.01.

Chinese classification (CCS): W20.

Estimated length of the Chinese original: 7,718 words.

Adopted international standard: TWC TM179-2001, IDT.

Supersedes the earlier edition FZ/T 70005-1992.
