What this standard covers

This standard specifies the terms and definitions of knitting with nylon/spandex double-spun yarn, product specification representation, requirements, test, judgment rule, marking, packaging, transportation and storage. This standard applies to a single spandex filament under a certain draw ratio for the core wire and is wrapped in two layers of twisted yarns formed by different nylon (polyester) filaments. Coated elastic yarn products and other similar products can refer to the implementation. This standard does not apply to special purpose or industrial double-coated silk products.

Document data

Chinese classification (CCS): W61.
