What this standard covers

This standard specifies the terms and definitions, sizes, requirements, test methods, sampling rules, judgment rules, instructions for use, packaging, transportation and storage of knitted clothing for physiological parameter collection. This standard is suitable for identifying the quality of clothing produced by combining physiological parameter collection systems such as body temperature, pulse rate, blood oxygen saturation, heart rate, and respiratory rate with knitted clothing carriers. This standard does not apply to products for infants and young children aged 36 months and below. This standard does not apply to products for medical use.

Document data

International classification (ICS): 59.080.30.

Chinese classification (CCS): W63.
