### What this standard covers

This standard specifies the type and parameters, requirements, test methods, inspection rules and signs, packaging, transportation and storage of non-woven fabric hot air bonding machines. This standard is applicable to the use of bicomponent fibers or mixed fibers containing low melting point fibers as raw materials, through hot air penetration heating, melting the low melting point fibers in the fiber web, and bonding the fibers to each other to form a hot air with a certain strong non-woven fabric. Bonding machine. A non-woven fabric hot air bonding machine using bicomponent filaments as a raw material can be referred to.

### Document data

International classification (ICS): 59.120.99.

Chinese classification (CCS): W93.
