What this standard covers

This standard specifies the main parameters, process flow, technical requirements, test methods, inspection rules, marking, packaging, transportation, and storage for open-width desizing, scouring, and bleaching combined machines. It applies to the design, manufacture, and inspection of such machines used for processing flat-width fabrics made of cotton, linen, and their blends, ensuring the fabric achieves satisfactory absorbency and whiteness.

Document data

International classification (ICS): 59.120.50.

Chinese classification (CCS): W95.

Estimated length of the Chinese original: 9,960 words.
