What this standard covers

This standard specifies the terms and definitions, basic parameters, requirements, test methods, inspection rules and signs, packaging, transportation and storage of textile heat resistance and moisture resistance testers. This standard applies to a textile heat resistance moisture resistance tester (hereinafter referred to as heat and moisture resistance instrument) that has a constant temperature and humidity function and uses the evaporation hot plate method to detect thermal resistance and moisture resistance at a specific air flow rate.

Document data

International classification (ICS): 59.120.99.

Chinese classification (CCS): W98.

Estimated length of the Chinese original: 9,918 words.
